i pay for this service its the best thing thats happened to a car or house in a long time.there always something on no commericals and i always know whats going on with the news, sports and traffic and weather.,and there stuff for the kids too unlike regular radio.i have friends who are truckdrivers and have xm radio and they need to know what the weather and traffic is like,and they like it because they never loose a station unlike fm. its our freedom to have stuff like this and someone always tried to take the good things away!!!
